#### POLICE COURT APPEAL.

A Very Important Question Decided by the District Attorney. National Capital Bridges. Entron Currier As an illustration of what other nations are doing in the way of building bridges at their capitals, it may be stated that one was built at Parls recently at a cost of \$1,000,000 or over. One is now being erected across the Thames at London, to cost \$3,500,000. It is a magnificent work, an illustration of which may be seen in the Scientic American of July 31. It is to be hoped that the day is not far It is to be hoped that the day is not far distant when our own Government will do something of the kind here, and that we may have one or more bridges worthy of the Nation and that shall be an ornament to the Capital. It is to be greatly regreted that the appropriation for the survey preparatory to the erection of the filmcoln-firmt memorial bridge was stricken out. Of all the projects suggested it is the best, for it combines sentiment, ornament and utility, and is every way preferable to the two monuments for which it had been proposed to appropriate \$1.000,000. Every proposed to appropriate \$1,000,000. Every ciffren of the country would feel a pride in such a structure at the National Capital, and every ciffren of the District should do all in his power to bring it about.

Washington, Aug. 5. W. C. Dodow.

It Should be Generally Known that the multitude of diseases of a scrotu-lous nature generally proceed from a torpid condition of the liver. The blood becomes impure because the liver does not act prop-erly and work off the poison from the sys-tem, and the certain results are blotches, pimples, cruptions, swellings, tumors, ulcers and kindred affections, or settling upon the lungs and poisoning their delicate tissues, until ulceration, breaking down and consumption is established. Dr. Pierce's "Golden Medical Discovery" will, by acting upon the liver and purifying the blood, cure all these diseases.
